

Invoice Finance

For larger companies we will offer a specific service provided that:

- you have an excellent financial condition (to be checked with your banker);
- you do not have debtor concentration risk issues (good spread);
- you do have a mature credit management department.

If your company meets these criteria we have a swift and easy financing solution based on your receivables

Fast and easy

Your banker will coordinate this service, we commit ourselves to a very fast decision process, a few days will suffice.

We do not intervene actively, nothing changes for you nor for your clients. The latter will not be informed about the cession of the invoices. This means that you remain in full control of the follow up, reminders, etc.

You continue to allocate the payments and match them with invoices outstanding.

To put it in other words, nothing changes for you, there is no impact whatsoever.

Cost efficient

With invoice financing we offer a flexible financing alternative at very attractive rates. We apply a flat service fee and offer the lowest interest rates available. Your KBC Corporate Banking Relationship Manager will be more than happy to provide you with a tailor-made offer.

Invoice Finance offers the easiest solution to accommodate your working capital needs.
